

Trade Summary for Felidae, 1994-2003

1. This document has been prepared by the Scientific Authority of the United States of America.
2. This document has been submitted to facilitate the discussion of the Review of Felidae (AC21 Doc. 11.3). The Annex to this document contains a summary of the trade in species of Felidae for the period 1994–2003, the most recent 10 years for which data are available. Excluded from the data summary are *Neofelis nebulosa*, *Panthera leo*, *Panthera tigris*, and *Uncia uncia*, consistent with the recommendation in AC21 Doc. 11.3 to exclude these species from review. However, *Panthera pardus* is included, with data for all subspecies and populations, since these are not listed separately in the Appendices, and also because no data in the UNEP-WCMC database are recorded below the species level for this species.
