Date 2.11.2000

**CITES Management & Scientific
Authorities (Flora) of Bolivia, Brazil,
Mexico, Paraguay and the United
States of America**

**Review of the CITES Appendices on behalf of the Plants Committee
Consultation of Range States**

Dear colleagues

At the 9th Meeting of the Plants Committee (PC) of CITES (1999), the PC trusted the CITES Management Authority (MA) of Switzerland with the review of several species of *Cacataceae*, that are presently listed in Appendix I. Consequently and according to Res. Conf. 11.1, the Swiss MA sent a document to the Management and Scientific Authorities of all range states concerned (as listed above) in January 2000. Copies were provided to the CITES Secretariat and to the Chair of the Plants Committee, and additionally to certain experts, such as the Species Survival Commission of IUCN. The document contained for all species under review (see Annex):

- (a) the year and proponent of Appendix I listing
- (b) a summary of the statement of the original proposal, justifying Appendix I listing
- (c) a compilation of scientific synonyms
- (d) a summary of all data of registered trade in wild-collected specimens, as provided by WCMC
- (e) some preliminary comments on registered trade, as approved by WCMC

Statements of the range States about the actual status of wild populations and the impact of international trade were sought, as well as a preliminary assessment by the range States, whether the present listing of these species in Appendix I is adequate according to the criteria of Res. Conf. 9.24.

Up to date, the CITES Authorities of the United States of America have responded, whereas statements of Bolivia, Brazil, Mexico and Paraguay are still wanting. This present state of the review will be reported now to the PC, at its 10th meeting (Shepherdstown, West Virginia, United States of America, 11-15 December 2000), through this letter.

The further proceeding of this review will be now as follows: Statements of range States, that have not yet responded, are urgently sought in order to allow the PC to conduct the review in full knowledge their data and assessments, according to Res. Conf. 8.21.

The final report will be prepared by the Swiss MA before the 11th Meeting of the PC and submitted to the Authorities of the range States and to the PC. All data that are received at least 90 days earlier, can be incorporated in the final report.

If statements of range States should still be missing at the time of 330 days before the scheduled meeting of the next Conference of the Parties, then the Swiss MA would ask the Secretariat to consult the Parties according to Res. Conf. 8.21. The PC would then be able to prepare proposals, as appropriate, to the Conference of the Parties.

We would like to thank, in the name of the PC, for the valuable contributions received so far.

Kind regards, yours sincerely

Permits and Inspections
CITES Management Authority (Flora)

Dr. Jonas M. Lüthy

Annex: Taxa under Review, as agreed by the Plants Committee at its 9th Meeting

Taxon	App. I-listing	Proposal	Range States
<i>Aztekium ritteri</i>	6.6.81	USA	Mexico
<i>Obregonia denegrii</i>	6.6.81	USA	Mexico
<i>Coryphantha werdermannii</i>	29.7.83	USA	Mexico
<i>Mammillaria pectinifera</i>	29.7.83	USA	Mexico
<i>Mammillaria solisoides</i>	29.7.83	USA	Mexico
<i>Strombocactus spp.</i>	29.7.83	USA	Mexico
<i>Astrophytum asterias</i>	22.10.87	USA	Mexico, USA
<i>Discocactus spp.</i>	11.6.92	Brazil	Bolivia, Brazil, Paraguay
<i>Melocactus conoideus</i>	11.6.92	Brazil	Brazil
<i>Melocactus deinacanthus</i>	11.6.92	Brazil	Brazil
<i>Melocactus glaucescens</i>	11.6.92	Brazil	Brazil
<i>Melocactus paucispinus</i>	11.6.92	Brazil	Brazil
