

## NOTIFICATION TO THE PARTIES

No. 2016/006

Geneva, 5 February 2016

CONCERNING:

New implementation report format  
(formerly known as biennial report)

1. At its 66th meeting (Geneva, January 2016), the Standing Committee adopted a new implementation report format that is not subject to compliance procedures. The last biennial report for 2013-2014 was due on 31 October 2015. To reflect the three year cycle between meetings of the Conference of the Parties, the implementation report covering the period 2015-2017 is due on 31 October 2018.
2. Subject to the availability of external funds, the Secretariat will make a version of the implementation report available using the CITES Online Reporting System by 31 October 2017 (at least a year in advance of the deadline set for submission of reports to the 18th Conference of the Parties).
3. The new implementation report format can be found in the Annex to this Notification.
4. This Notification replaces Notification to the Parties No. 2005/035 of 6 July 2005.

### **Implementation report format**

The format below follows the structure of the *CITES Strategic Vision: 2008-2020* and aims to collect information to enable the Strategic Vision indicators to be implemented.

#### **CITES vision statement**

Conserve biodiversity and contribute to its sustainable use by ensuring that no species of wild fauna or flora becomes or remains subject to unsustainable exploitation through international trade, thereby contributing to the significant reduction of the rate of biodiversity loss and making a significant contribution towards achieving the relevant Aichi Biodiversity Targets.

Article VIII, paragraph 7 (b), of the Convention requires each Party to submit to the CITES Secretariat a report on legislative, regulatory and administrative measures taken to enforce the provisions of the Convention.

The report format allows Parties to present information in a standard manner, so that it can be easily collated, with three main objectives:

- i) To enable monitoring of the implementation and effectiveness of the Convention;
- ii) To facilitate the identification of major achievements, significant developments, or trends, gaps or problems and possible solutions; and
- iii) Provide a basis for substantive and procedural decision-making by the Conference of the Parties and various subsidiary bodies.

Information on the nature and extent of CITES trade should be incorporated into the annual report [Article VIII paragraph 7 (a)], whereas the report provided under Article VIII paragraph 7 (b) should focus on measures taken to implement the Convention.

The report should cover the period indicated in [Resolution Conf. 11.17 \(Rev. CoP16\)](#) which urges that the report should be submitted to the Secretariat one year before each meeting of the Conference of the Parties (CoP). The reason for setting the report to be due a year in advance of the following CoP is to allow information to be collated so it can be considered by the Standing Committee in advance of CoP, and enable publication of the Strategic Vision indicators in advance of CoP.

Reports should be prepared in one of the three working languages of the Convention (English, French, Spanish).

Parties are *strongly* encouraged to prepare and submit their reports in electronic form. This will facilitate timely integration of information from Parties into publication of the Strategic Vision Indicators. If reports are only provided in hard copy, resources will be needed at the Secretariat to make an electronic copy, and this is not good use of Secretariat resources.

The completed report should be sent to:

## **GOAL 1 ENSURE COMPLIANCE WITH AND IMPLEMENTATION AND ENFORCEMENT OF THE CONVENTION**

**Objective 1.1** Parties comply with their obligations under the Convention through appropriate policies, legislation and procedures.

All Aichi Targets relevant to CITES, particularly Aichi Target 2, Target 6, Target 9, Target 12, Target 17 and Target 18.

**Indicator 1.1.1:** The number of Parties that are in category 1 under the national legislation project.

1.1.1a	Have any CITES relevant policies or legislation been developed during the period covered in this report? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> If 'Yes', have you shared information with the Secretariat? Yes <input type="checkbox"/> No <input type="checkbox"/> Not Applicable <input type="checkbox"/> If 'No', please provide details to the Secretariat with this report:
1.1.1b	Does your legislation or legislative process allow easy amendment of your national law(s) to reflect changes in the CITES Appendices (e.g. to meet the 90 day implementation guidelines)? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> If 'No', please provide details of the constraints faced:

**Objective 1.2** Parties have in place administrative procedures that are transparent, practical, coherent and user-friendly, and reduce unnecessary administrative burdens.

Aichi Target 3.

**Indicator 1.2.1:** The number of Parties that have adopted standard transparent procedures for the timely issuance of permits in accordance with Article VI of the Convention.

		Yes	No	No information
1.2.1a	Do you have standard operating procedures for application for and issuance of permits? Are the procedures publicly available?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
		<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
1.2.1b	Do you have:			
	Electronic data management and a paper-based permit issuance system?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	Electronic permit information exchange between Management Authorities of some countries If 'Yes', please list countries	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

	Electronic permit used to cross border with electronic validation	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

by customs?			
If 'Yes' to any of the above, please provide information on challenges faced or issues overcome:			
If 'No', do you have any plans to move towards e-permitting <sup>1</sup> ?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
If you are planning to move towards e-permitting, please explain what might help you to do so:			

Indicator 1.2.2: The number of Parties making use of the simplified procedures provided for in [Resolution Conf. 12.3 \(Rev. CoP16\)](#).

1.2.2a	Has your country developed simplified procedures for any of the following?	Tick all applicable		
		Yes	No	No information
	Where biological samples of the type and size specified in Annex 4 of <a href="#">Resolution Conf. 12.3</a> (Rev. CoP16) are urgently required.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	For the issuance of pre-Convention certificates or equivalent documents in accordance with <a href="#">Article VII</a> , paragraph 2.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	For the issuance of certificates of captive breeding or artificial propagation in accordance with Article VII, paragraph 5.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	For the issuance of export permits or re-export certificates in accordance with Article IV for specimens referred to in Article VII, paragraph 4.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Are there other cases judged by a Management Authority to merit the use of simplified procedures? If 'Yes', please provide details:	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

**Objective 1.3** Implementation of the Convention at the national level is consistent with decisions adopted by the Conference of the Parties.  
[All Aichi targets relevant to CITES, particularly Target 9, Target 14 and Target 18.](#)

Indicator 1.3.1: The number of Parties that have implemented relevant reporting under Resolutions and Decisions of the Conference of the Parties and/or Standing Committee recommendations.

1.3.1a	Has your country responded to all relevant special reporting requirements that are active during the period covered in this report, including those in the Resolutions and Decisions of the Conference of the Parties, Standing Committee recommendations, and Notifications issued by the Secretariat (see <a href="#">link to location on the CITES website where the reporting requirements are listed</a> )?
	Responses provided to ALL relevant reporting requirements <input checked="" type="checkbox"/> Responses provided to SOME of the relevant reporting requirements <input type="checkbox"/> Responses provided to NONE of the relevant reporting requirements <input type="checkbox"/> No special reporting requirements applicable <input type="checkbox"/>

All Resolutions, Decisions and Notifications are transferred to CITES Authorities regularly by Ministry of Forestry and Rural Affairs

<sup>1</sup> e-permitting refers to the electronic (paperless) management of the permit business process, including permit application, Management Authority – Scientific Authority consultations, permit issuance, notification to customs and reporting.

1.3.1b	Were any difficulties encountered during the period covered in this report in implementing specific Resolutions or Decisions adopted by the Conference of the Parties? <span style="float: right;">Yes <input type="checkbox"/> No <input checked="" type="checkbox"/></span> If 'Yes', please provide details of which Resolution(s) or Decision(s), and, for each, what difficulties were / are being encountered?

<sup>4</sup> Capacity to use forensic technology means the ability to collect, handle and submit samples from crime scenes involving CITES-listed species to an appropriate forensic analysis facility, located either in your country or in another country(ies).

<sup>5</sup> A multi-disciplinary law enforcement operation is one that involves officers from all relevant enforcement disciplines as appropriate, for example officers from Police, Customs and the wildlife regulatory authority. It could be either sub-national, national or international in scope.

<sup>6</sup> General crime laws relate to offences such as fraud, conspiracy, possession of weapons, and other matters as set out in the national criminal code.

<sup>7</sup> Article 2, paragraph (h) of the United Nations Convention against Transnational Organized Crime defines a predicate offence is an offence whose proceeds may become the subject of any of the money-laundering offences established under the Convention.

<sup>8</sup> Asset forfeiture is the seizure and confiscation of assets obtained from criminal activities to ensure that criminals do not benefit from the proceeds of their crimes.

<sup>9</sup> Provisions against corruption include national laws to implement the United Nations Convention against Corruption covering offences such as bribery of officials, embezzlement or misappropriation of public funds, trading in influence and abuse of functions by public officials.

<sup>10</sup> International cooperation in criminal matters includes legislation through which a formal request for mutual legal assistance and/or extradition of a person for criminal prosecution can be forwarded to another country.

<sup>11</sup> Article 2, paragraph (a) of the United Nations Convention against Transnational Organized Crime defines an organized criminal group as a structured group of three or more persons, existing for a period of time and acting in concert with the aim of committing one or more serious crimes or offences established in accordance with the Convention, in order to obtain, directly or indirectly, a financial or other material benefit.

## CITES IMPLEMENTATION ABOUT NATURAL BULBS

The Ministry of Food Agriculture and Livestock; General Directorate of Plant Production as the management authority for plants, by its own national regulation, works on the issues of natural flower bulbs.

Regulation of natural flower bulbs are issued by “Regulations about Production, Uprooting from Wild and Exporting Natural Flower Bulbs” which was published in the Official Gazette dated 19 July 2012 numbered 28358. This regulation proper CITES Convention too.

The objectives of this regulation are to arrange principles pertaining to uprooting from nature, production, storing and export of flower bulbs without harming species and Turkey’s flora.

Turkey has different topographical, geographical and climatic regions. When export quotas are to be determined, each region’s characteristics related with natural reproduction and artificial propagation are taken into consideration. Exporter companies and collectors are also consulted. Exporter companies are also authorised according to the regulation. So if a firm has no authorised for the exporting about natural bulbs it doesn’t export.

According to the regulation, The Ministry of Food Agriculture and Livestock set the Technical Committee. The Technical Committee consisted from representatives of **Natural Flower Bulbs Experts Council**, Ministry of Forestry and Water Affairs, Ministry of Economy, Ministry of Customs and Trade, and Ministry of Food, Agriculture and Livestock. The Technical Committee takes decisions related to the all issues of natural flower bulbs. **The Natural Flower Bulbs Experts Council** constituted from the academicians and Scientific Authority of Turkey (TUBITAK) from the various universities of Turkey.

The Committee hold a meeting twice in a year. The first one is spring meeting and the second one is autumn meeting. In the autumn meeting our country’s quotas are determined and in the spring meeting these quotas are given out among the firms by The Ministry of Food Agriculture and Livestock; General Directorate of Plant Production according to the regulation.

In autumn meeting, before the determined the country’s quotas **The Natural Flower Bulbs Experts Council** observe the natural areas, producing areas and the firms. After then The Council presents the report about these. According to the report and other technical committee representatives’ assessments our country’s quotas for the species are determined by the technical committee. Also the committee are determined the harvesting area and forbidden area for our country for the natural bulbs. Every year the determined quotas are listed and published as “Export List of Natural Flower Bulbs” in the Official Gazette.

Within the determined quotas and harvesting areas all uprooting from nature, production, storing is checked by related establishments. Also, all CITES permits are arranged by Ministry of Food, Agriculture and Livestock - General Directorate of Plant Production following to the quota system.

Also, the management authority of Turkey informs the CITES Secretariat about the total quotas for the CITES species. However, by comparing the trade records all the time,

management authority controls the quotas for wild, artificially propagated and growing material. All flower bulbs which are listed or not listed in CITES appendices are exported from Turkey under the species names.

## Final Report of the National Operation of Turkey

### General Information:

**The purpose of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)** is to provide and arrange the sustainable use of the wild animals and plants species which are included in the Appendices of the CITES Convention by taking control of their international trade through the principles and methods in coordination with relevant foundations and associations. The implementation of CITES involves different departments and all of them play an important role. In Switzerland The CITES Secretariat; supplies coordination with the all of the parties in the world. CITES Convention has 181 Parties.

Turkey has been a party of the CITES Convention since 1996. **By-law on the Implementation of the Convention on International Trade in Endangered Species of Wild Fauna and Flora** was published in the Official Gazette dated December 27,2001 with no. 24623 and was revised in 2004.

Turkish Responsible Authorities have been identified according to the By-law on the Implementation of the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

**Management Authorities** are the Ministry and Forestry and Water Affairs, Ministry of Food, Agriculture and Livestock

**Scientific Authority** is the Scientific and Technological Research Council of Turkey (TUBITAK) and

**Enforcement and Related Authorities** are Ministry of Interior, Ministry of Customs and Trade and Ministry of Economy.

**General Directorate of Nature Conservation and National Parks is** the main Management Authority and **the focal point of the CITES Convention.** The main Management Authority deals with the general coordination, co-operation, communication between Secretariat, Parties, Management, Scientific and Enforcement Authorities and the other Institution and organizations. The annual and biannual reports are prepared regularly.

The trade (export, import and re-export)of the specimen listed in the CITES annexes is controlled with certification by the related to Management Authorities. Management Authorities issue the CITES permits. Ministry and Forestry and Water Affairs gave authorization to Directorate of Provinces (Ankara, Antalya, Istanbul and Izmir) to issue CITES Permits. Directorate of Provinces (Ankara, Antalya, Istanbul and Izmir) issue the CITES permits and certificates which contain birds, mammals other than the sea mammals, reptiles, amphibians and arthropods and completion of formalities required for a specimen within the Lists I, II and III of according By-Law on CITES and General Directorate of Forestry issues the CITES Permits for forest trees and wood products.

**Related Legislation:**

Without any permit; mammals other than the sea mammals, reptiles and birds imported from the other countries, also some of them taken from wild according to **Terrestrial Hunting Law (code 4915)**

The penalty is between 800 TL (Turkish Liras) and 3804 TL(Turkish Liras) for each subject; according to the violation of the provision of the article number 4, 18 and 28 of **Terrestrial Hunting Law (code 4915)**

The penalty is 20.000 TL(Turkish Liras) (35.000 TL including value-added tax ) for each subject; according to the violation of the provision of the article number 9 and 20 of **Environment Law (code 2872).**

According to Violation of **Anti-smuggling Law No.5607**; export and import of the CITES related matters is prohibited by law. Because of this regulation, it is stated in our anti smuggling law that, if a person exports the CITES related matters shall be punished from one year up to three years imprisonment and five thousand days of judicial fine . Moreover, if a person imports the CITES related matters shall be punished from two years up to six years imprisonment and twenty thousand days of judicial fine. A person who buys, exposes for sale, sells, carries or stores the property on purpose, shall be punished with the same penalty.

**Preparation of National Operational Plan;**

In this framework; Turkey National Operational Plan was prepared for the birds, reptiles, mammals, leather parts and derivatives, timber parts and derivatives. We chose 17 cities for operation; according to intensity of CITES trade and the location. Operation duration was; March, April and May. Participating Authorities were; The Ministry of Forestry and Water Affairs (Center and Provincial Staff), The Ministry of Interior (Interpol, Police and Gendarmerie) and Ministry of Customs and Trade. Operation Coordinator was Ministry of Forestry and Water Affairs.

**Operation Purpose:**

The aim of the operation was to increase the public awareness about what CITES is, its rules and conditions for the international trade of the specimens of the species regulated under the Convention and to control of CITES trade to prevent illegal trade and provide the sustainability of biodiversity.

**Extent of coverage:**

The project covered the 17 local offices of Ministry of Forestry and Water Affairs which contain 4 CITES Offices, 17 Customs points and offices, 17 police offices. All related officers participated to this operation.

**Operation Activities;**

In operation duration; firstly we visited the 17 local offices of Ministry of Forestry and Water Affairs which contain 4 CITES Offices and we gave them information about operation and CITES implementations and then; we controlled the Passenger and the Cargo Departments of Custom points to check the CITES permits. After the control; we gave training program about

CITES implementations to Customs officers. Lastly; we visited to the police offices to give information and as the final step; we controlled some pet shops, leather and fur companies.

**Some Training Materials;**

Some Identification materials (identification guides, informative brochures and posters) were distributed to the related officers.

**Outputs of the Operation:##**

In the operation; some ivory products, fur, snake and crocodile skins products, caviar and parrots were confiscated and the administrative penalties were given.

## **Additional Report on the Medicinal Leeches**

Turkey is located to far south of the natural geographic range of *H. medicinalis* (as given in Utevsky et al., 2010; Trontelj & Utevsky, 2012) and that since 2011 Turkey has only published CITES quotas and reported leech exports as *H. verbana*.

Turkey is geographically located at the intersection of Europe, Asia, Middle East and Africa. This geographical location enriches Turkey's biodiversity. At present, there are two species of medicinal leech, namely *H. verbana* and *H. sulukii* in Turkey. However, as molecular investigations progress and more intense studies indicate that *H. medicinalis* and new medicinal leech species can be seen in Turkey.

There are one molecular study on medicinal leeches in Turkey identified *Hirudo* species (Saglam et alü 2016). In this study, *H. verbana* and a new medicinal leech species, *Hirudo sulukii* of *Hirudo* genus are defined. Saglam (2011, in Turkish) lists both *H. verbana* and *H. medicinalis* as occurring in Turkish wetlands based on the morphological identification in Table 1 (provided in the previous report).

There is legal protection of leeches in the wild in Turkey. According to the Communiqué No 4/1 (Communiqué No: 2016/35) of the Ministry of Food, Agriculture and Livestock, the collection of medical leeches from wild wetlands between March 1 and June 30 (in reproductive period) is prohibited in Turkey. Additionally, all leech collectors must have licenses for collecting leeches and they have to issue origin certificate for their products and submit to provisional directorate of Ministry of Food Agriculture and Livestock. Origin certificates are registered into Fisheries Information System. Therefore, it is considered that the export quota of 2000 kg can be maintained. Although there is not continuing monitoring program for *H.verbana*, there are some observations at the sites where collection taking place and some scientific studies has been ongoing.

**Project Title:** Natural Flower Bulb Plants Protection Project

**Project Purpose:** Providing sustainable use by producing natural flower bulb plants which are endemic in our country

## NATIONAL BIODIVERSITY INVENTORY AND MONITORING PROJECT:

-The main aim of the Project is inventory and monitoring of vascular plants, vertebrate animals at each province level

-The Project will be completed for 81 provinces between 2013-2018 years

**Project Period:** 2013-2018 (6 Years)

**Purpose of the Project:**

1-Determining current situation of flora and fauna taxa of Turkey with literature based studies.

2-Collecting new data (Flora, Fauna, habitat types.....) with field inventory surveys and update the current flora and fauna data in cooperation with universities, NGO, etc.

3- Grouping the data according to endemism, IUCN, BERN, CITES and other significant criteria.

4- Monitoring indicator species, their habitats and ecosystems.

5-Determining threats on taxa and habitats and recommendations on removal of threats.

6-Obtaining GIS data and prepare maps which will be helpfull in conservation studies.

7-Uploading the data to Noah's Ark database.

## **Wild Life in Turkey**

Turkey has a very rich biodiversity because of its geographical location on the world and also because of its geological and morphological structure. This diversity is also valid for game and wildlife.

Breeding stocks of domesticated plants and animals are essentially provided from the wild species. Because of this reason, the natural resources are the common heritage of not only the country also of the entire world.

The game and wildlife in Turkey is being managed by General Directorate of Nature Conservation and National Parks under the Ministry of Forestry and Water Affairs. Sustainability is our essential principle for the management of game and wildlife. Sustainable management, therefore, is only possible with the establishment of protection and exploitation balance.

Turkey, as a country at the intersection of 5 gene centers, has a geographical location that is rich in biodiversity.

Both the climate and topography have played an important role in maintaining astonishing biodiversity in Turkey. Turkey has a very rich flora and fauna with more than 11 000 species of plants, 150 species of mammals, 481 species of birds, 716 species of fish and 130 species of reptiles. In addition, two of the three major flyways for millions of migratory birds, which move between the Western Palearctic and Africa each year, pass through Turkey.

The Turkish Constitution, laws, regulations, and international conventions such as Paris, Ramsar, Bern, Washington (CITES), Barcelona, Combatting Desertification, and Biological Diversity provide the legal framework for nature conservation, sustainable resource use and management. Forest Law coded 6831 enacted in 1956, National Parks Law coded 2873 enacted in 1983, and Land Hunting Law coded 4915 enacted in 2003 authorizes Ministry of Forestry and Water Affairs for conservation, improvement, and sustainable management of forests, wildlife resources, and biodiversity.

Our culture attaches great importance to conserve nature. Nature conservation practices of Turkey have been institutionalized since 1839.

Sustainable management of wildlife resources depends on successful conservation. For the successful implementation of conservation measures an efficient inspection and control mechanisms have to be developed. Within the frame of this policy, wildlife rangers working in 15 regional and 81 provincial offices of the Ministry of Forestry and Water Affairs have been trained in inspection procedures and a handbook is prepared, published, and distributed to all provincial and regional offices in order to provide standardization. In addition, to develop an efficient control mechanism, necessary equipment such as guns, radios, binoculars, cameras, sleeping bags, tents, and field vehicles have been provided to all the rangers in the provincial and regional offices.

Wildlife managers have been working to maintain or restore rare and declining wildlife populations for more than 50 years in Turkey. Especially since the adoption of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) more resources and public attention have been focused on species that are legally recognized as endangered or threatened. There are 20 wildlife breeding stations in Turkey for raising species of birds such as Bald Ibis, (*Geronticus eremita*), pheasants, partridges, and species of big mammals such as Anatolian Mouflon, red deer, roe deer, fallow deer, and gazella. Wild animals raised in captivity are released into wild at selected sites according to IUCN guidelines for re-introduction and restocking purposes. Personnel at the Center of GDNCNP as well as at the regional directorates have been trained on IUCN guidelines on captive breeding and re-locations of wild animal species and on wild animal breeding in order to improve game stocks. Turkey is rewarded with the prestigious Edmond Blanc Prize of the CIC (The International Council for Game and Wildlife Conservation) for the conservation of Anatolian Mouflon in Konya Province. The Price is rewarded for outstanding efforts of Turkey in wildlife conservation and game management based on the principles of sustainable use of wildlife resources. Besides, according to the Turkish laws, regulations, and international conventions such as CITES, we have been establishing Wild Animal Rescue Centers for injured and confiscated wild animals . So far we have established 6 Wild Animal Rescue Centers in different regions. In addition, we have a plan to establish 9 Wild Animal Rescue Centers in the other different regions.

Turkiye has been a party of the CITES Convention since 1996. By-law on the Implementation of the Convention on International Trade in Endangered Species of Wild Fauna and Flora was published in the Official Gazette dated December 27,2001 with no. 24623 and was revised in 2004. Because of By-law on CITES; Turkey takes place in Category A (I). According to By-law on the Implementation of the Convention on International Trade in Endangered Species of Wild Fauna and Flora; **Management authorities** are; Ministry of Forestry and Water Affairs and the Ministry of Food, Agriculture and Livestock, **Scientific Authority** is the Scientific and Technological Research Council of Turkey (TUBITAK) and **Enforcement Authorities** are Ministry of Interior, Ministry of Customs and Trade.
