

**Decision 19.189: Technical workshop on Aquatic species listed in the CITES Appendices**

**Discussion – breakout group topics**

# Discussion topic 1

Based on document CoP19 Doc. 87.2, the background document and other scientific information, when considering Elasmobranchii and other aquatic species:

- Share experiences with past proposals
- Has the wording in footnote 2 and relevant provision in Res. Conf. 9.24 (Rev. CoP17) (e.g. use of precautionary measures) enhanced or hindered proposing and listing of species?
- Have there been any challenges/issues in applying footnote 2 and relevant provision in Res. Conf. 9.24 (Rev. CoP17) ?
- Is there a need for further clarification of footnote 2?
