

Annex 4**TESTUDINES taxa identified as candidates to be listed under the name of a higher taxon without altering the scope of the original CITES listing as outlined in Decision 15.63**

Compiled by the Nomenclature specialist of the AC
assisted by PETER PAUL VAN DIJK (IUCN/SSC Tortoise and Freshwater Turtle SG)

Taxa listed	Background information	possible higher taxon listing
<i>Carettochelys insculpta</i>	this species constitutes the only species of the family <i>Carettochelyidae</i>	<i>Carettochelyidae</i> spp.
<i>Pseudemydura umbrina</i>	this species constitutes the only species of the genus <i>Pseudemydura</i>	<i>Pseudemydura</i> spp.
<i>Macrochelys temminckii</i>	this species constitutes the only species of the genus <i>Macrochelys</i>	<i>Macrochelys</i> spp.
<i>Dermatemys mawii</i>	this species constitutes the only species of the family <i>Dermatemydidae</i>	<i>Dermatemydidae</i> spp.
<i>Dermochelys coriacea</i>	this species constitutes the only species of the family <i>Dermochelyidae</i>	<i>Dermochelyidae</i> spp.
<i>Geoclemys hamiltonii</i>	this species constitutes the only species of the genus <i>Geoclemys</i>	<i>Geoclemys</i> spp.
<i>Heosemys annandalii</i> <i>Heosemys depressa</i> <i>Heosemys grandis</i> <i>Heosemys spinosa</i>	these species constitute the only species of the genus <i>Heosemys</i>	<i>Heosemys</i> spp.
<i>Leucocephalon yuwonoi</i>	this species constitutes the only species of the genus <i>Leucocephalon</i>	<i>Leucocephalon</i> spp.
<i>Malayemys macrocephala</i> <i>Malayemys subtrijuga</i>	these species constitute the only species of the genus <i>Malayemys</i>	<i>Malayemys</i> spp.
<i>Notochelys platynota</i>	this species constitutes the only species of the genus <i>Notochelys</i>	<i>Notochelys</i> spp.
<i>Orlitia borneensis</i>	this species constitutes the only species of the genus <i>Orlitia</i>	<i>Orlitia</i> spp.
<i>Sacalia bealei</i> <i>Sacalia pseudocellata</i> <i>Sacalia quadriocellata</i>	These species constitute all species contained within the genus <i>Sacalia</i> ¹	<i>Sacalia</i> spp.

¹ Note that *pseudocellata* is a hybrid taxon

Taxa listed	Background information	possible higher taxon listing
<i>Siebenrockiella crassicollis</i> <i>Siebenrockiella leytensis</i>	this species constitutes the only species of the genus <i>Siebenrockiella</i>	<i>Siebenrockiella</i> spp.
<i>Platysternon megacephalum</i>	this species constitutes the only species of the family <i>Platysternidae</i>	<i>Platysternidae</i> spp.
<i>Erymnochelys madagascariensis</i> <i>Peltocephalus dumerilianus</i> <i>Podocnemis</i> spp.	<i>E. madagascariensis</i> constitutes the only species of the genus <i>Erymnochelys</i> and <i>P. dumerilianus</i> constitutes the only species of the genus <i>Peltocephalus</i> . Together with <i>Podocnemis</i> spp. these species constitute the only species of the family <i>Podocnemididae</i>	<i>Podocnemididae</i> spp.
<i>Astrochelys radiata</i> <i>Astrochelys yniphora</i>	these species constitute the only species of the genus <i>Astrochelys</i>	<i>Astrochelys</i> spp.
<i>Pyxis arachnoides</i> <i>Pyxis planicauda</i>	these species constitute the only species of the genus <i>Pyxis</i>	<i>Pyxis</i> spp.
<i>Amyda cartilaginea</i>	this species constitutes the only species of the genus <i>Amyda</i>	<i>Amyda</i> spp.
<i>Lissemys punctata</i> <i>Lissemys scutata</i>	these species constitute the only species of the genus <i>Lissemys</i>	<i>Lissemys</i> spp.
<i>Palea steindachneri</i>	this species constitutes the only species of the genus <i>Palea</i>	<i>Palea</i> spp.
