Our Ref. S. 285/KKH-1/2012

To :

Mr. John E. Scanlon

Secretary General

CITES

Re: Indonesia's Objection on Registration of Operation that Breed Appendix I Animal Species in Captivity for Commercial Purposes

Dear Sir,

With reference to the Animals Committee comments to the Indonesia's Objection on "*Registration of Operation that Breed Appendix I, Animal Species in Captivity for Commercial Purposes of four Indonesian Cacatua species proposed by the Philippines*", the CITES MA of Indonesia would like to convey the following issues:

1. *Cacatua moluccensis* was listed on Appendix II under *Psittaciformes spp.* for the first time on 6 June 1981 and then up listing into Appendix I on 18 January 1990.
  - a. The Philippines tried to provide the evidence of the parent stock of *C. moluccensis* by showing the import permit from Singapore on 18 January 1982 and valid until 31 March 1982 (see AC 26. Doc. 25 Annex 1 exhibit B): It means that the specimen acquired after it was listed on CITES Appendices or **was not pre convention** specimen (see the historical Appendices listing).
  - b. In accordance with article IV point 2, the export of any specimen of a species included in Appendix II shall require the prior grant and presentation of an export permit. Furthermore, article IV point 4 said that the import of any specimen of a species included in Appendix II shall require the prior presentation of either an export permit or a re-export certificate. Therefore for complying well implementation of the convention, the Philippines shall also provide the evidence of export permit from Singapore Authorities (even though on that time Singapore has not yet ratified CITES, then the trade should comply with the article X).
  - c. Indonesia took note that *C. Moluccensis* was traded from Indonesia and other non range-states of the species on 1982 as also mentioned by AC comments through an email of Secretariat dated on 27 March 2012, attached as Annex 1).

However according to point 1.b. above and also considering article IV and article X of the convention, Indonesia would like to ask the Secretariat and AC to draw attention that point 3 and 5 of AC comments (annex 1) do absolutely not support the compliance of the convention. Therefore **it should be deleted or ignored since the sentence is against the convention, particularly article IV and article X.** In case the Secretariat and AC do not do that, the evidence could be a bad precedent for other trade cases of appendix II species in the future.

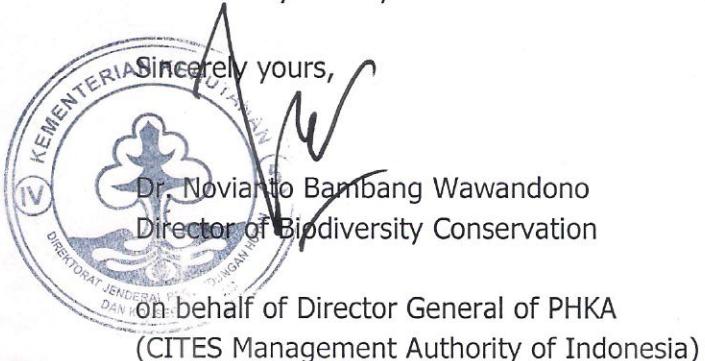

- d. Indonesia has been carried out study and observation on the WCMC trade data which showed unbelievable result. We find neither the legal export of *C. moluccensis* from Singapore to Philipines on 1982 nor legal import by Philippines from any other countries (as annex 2).
  - e. The facts on point 1.d above proven that import permit document given by the Philippines as a evidence of legal founder stock is fraud or likely fake. Therefore Registration of Operation that Breed Appendix I *C. Moluccensis* in Captivity for Commercial Purposes by Philippines do not comply the Resolution Conf. 12.10 (Rev CoP15) and should be rejected by Secretariat, AC, and all parties.
2. *C. Sulphurea* was listed on Appendix II under *Psittaciformes spp.* for the first time on 6 June 1981 and up listing into Appendix I on 18 January 1990.
- a. Philippines provided the evidence of *C. sulphurea* parent stock by showing the pre convention Certificate as AC 26 Doc 25 Annex 2-4.
  - b. According to article VII point 2 the exemption of the provisions of Articles III, IV and V when the MA exports the specimen (*the State where removal from the wild*) could convince that the specimen was acquired before the provisions of the present convention applied to such specimens. Indonesia assumed that the pre convention certificate should be issued by exporter country and should be not issued by the importer country (i.e. the Philippines). Therefore the registration did not comply the convention and the resolution 12.10 (Rev CoP15), thus the comment of the AC (as stated on Annex 1) should be reviewed.
  - c. In addition, Indonesia obtained the information that parent stock of *C. sulphurea* was also obtained illegally, due to some information's indicated there was a relationship between BII captive breeding operation and the birds smuggling. It proved as annex 3-6 that there was a relationship between Antonia De Dios (the owner of BII) and Roy Nichols, someone who arrested because of exotic bird's smuggling. Annex 5 and 6 showed that until 1991 Antonia De Dios still import from Nichols some birds CITES appendices.

- d. Registration of Operation that Breed Appendix I Animal Species in Captivity for Commercial Purposes by Philippines rejected twice on CoP 14 and CoP 15, where the most reason are BII Inc had been failed to prove the legality of the founder stock. The evidence documents have been provided step by step by BII. It also indicated that the documents might be made recently.
  - e. Based on the facts on point 1 and point 2a – 2d, Indonesia asks AC, SC and Secretariat to come to a decision that the founder stocks of Indonesian Cacatua species were obtained illegally.
3. MoU between Indonesia and Philippines is voluntary initiative, but the action plans pursue the Philippines to combat illegal birds smuggling together with Indonesia so that it does not keep occurred. This proposed by doing joint monitoring and investigating, and supporting in-situ conservation, such as research, repatriation, and habitat management. Secretariat, AC and SC should support the initiative for global conservation on endangered bird species. However the Philippines does not demonstrate a goodwill intention to discuss seriously with Indonesia and to implement the MoU by reviewing the feasibility of the action plan.

According to above arguments, CITES MA of Indonesia would like to retain our objection to the Philippines registration and ask the support from Secretariat, AC, and SC to combat illegal trading as the provision of the convention.

Thank you for your kind attention and consideration.

**Subject:** Indonesia's objection to the CITES registration of four species of Appendix-I Cacatua by Birds International, Inc. (Philippines)

Dear Mr Novianto Bambang Wawandono,

On 5 January 2012, Indonesia objected to the inclusion in the CITES registration of four species of Appendix-I Cacatua bred in captivity for commercial purposes by Birds International, Inc. (Philippines). In compliance with Resolution Conf. 12.10 (Rev. CoP15), Annex 2, paragraph 3, the Animals Committee commented on the objection during its 26th meeting (Geneva, 15-20 March 2012). The Animals Committee's comments are as follows:

***Legality of founder stock***

2. *The Committee noted that it was a requirement of Resolution Conf. 12.10 (Rev. CoP15) that the Management Authority of the State in which the breeding operation is situated should provide evidence that the parental stock had been obtained in accordance with national measures and with the provisions of the Convention. Indonesia's concerns and objection were thus within the scope of the Resolution.*

3. *The Committee felt that the Philippines seemed to have provided as much evidence as they are able to do, given that the founder stock were acquired before the species were listed on the Convention (c30 years ago). This evidence cannot include CITES documentation such as export permits because there was no such requirement for them at the time.*

4. *Whilst determining legal origin of specimens is not a function of the Animals Committee, the Committee felt able to advise on the likelihood of the species being in trade at the time.*

5. *The Committee noted that the proposal to list these species (as Psittaciformes, made to CoP3 in 1981), noted the availability, as a result of international trade, of specimens of *C. moluccensis* and *C. sulphurea*, in non-range states. Equally, immediately following the listing of the two species, CITES trade data indicate significant volumes of birds were traded from Indonesia, the sole range state, from 1982 onwards. But trade was also recorded from many other non-range states thus indicating that trade to these countries must have taken place before listing. In other words, the Committee felt that it was likely that significant trade in these species had occurred before listing of the species.*

***Registration of the operation in the Philippines should be delayed pending the adoption of an action plan between Indonesia and the Philippines***

6. *The Committee was encouraged to note that a Memorandum of Understanding between Indonesia and the Philippines, addressing support to the in situ conservation of Indonesian Cacatua spp. as encouraged in Resolution Conf. 13.9, had been signed by both Parties.*

7. *It noted that a draft action plan was under consideration between the two Parties and that a meeting to discuss this was planned for April 2012. The Committee hoped that this would result in a productive solution acceptable to both Parties.*

8. *However, the Committee did not consider that an objection on these grounds was a legitimate reason to prevent registration taking place because such cooperative agreements, whilst encouraged in Resolution Conf. 13.9, are voluntary actions and are not a requirement for registration under Resolution Conf. 12.10 (Rev. CoP15).*

In addition, and should the objection be maintained, the Animals Committee also recommended that the Standing Committee consider in detail the issue of the legality of the founding parental stock.

In compliance with Resolution Conf. 12.10 (Rev. CoP15), Annex 2, paragraph 3, the Secretariat is now forwarding these comments to Indonesia and the Philippines, and the two Parties have a further 30 days for resolution of the identified problem(s), that is until 26 April 2012.

We should therefore be grateful if you could inform us by that date whether Indonesia wishes to withdraw or retain its objection. If the objection is not withdrawn or the identified problem(s) not resolved within the 30-day period, the Secretariat shall submit the application to the Standing Committee at its 62nd meeting(Geneva, 23-27 July 2012), in accordance with Resolution Conf. 12.10 (Rev. CoP15), Annex 2, paragraph 4. The same paragraph provides that:

- a) *If the Committee considers the objection trivial or ill-founded, it shall reject it and the application shall be accepted.*
- b) *If the Committee considers the objection justified, it shall review the response of the applying Party and decide whether or not to accept the application.*

We look forward to hearing from you.

Yours sincerely,

Laurent Gauthier (Mr)

# NZ smugglers 'launder' exotic bird eggs: Crown

New Zealand has been used as a staging-post by international bird-egg smugglers, putting native species at risk, the High Court at Auckland heard yesterday.

Australian species, in particular, have been brought into the country for "laundering" before being shipped on — on the face of it legally — to customers in other countries.

The case before Justice Salmon and a jury is the first trial involving bird eggs and reptiles since the introduction of the Bio-Security Act in 1993.

Before the court are an exotic bird-breeder, Roy Sydney Bruce Nichols, aged 40, of Mangopui, represented by Peter Kaye, and James Stuart Bradshaw, 28, unemployed, of no fixed address, represented by Christopher LaHatte.

They are jointly accused of acquiring and possessing about 50 eggs of the long-billed corella and the galah species in September 1994.

In addition, Nichols is accused of acquiring and possessing 20 assorted bird eggs in October 1994 and attempting to possess 13 tortoises and four chameleons at Auckland in August 1995.

Prosecutor Brian Dickey said two of

the charges related to international bird-egg smuggling and one concerned reptiles brought in from the United States where the courier was stopped by customs officials at Auckland Airport.

The reptile importation, he said, was very much a sideline after a plan to bring in a batch of threatened military macaw eggs from the United States failed.

Tortoises have a market value up to \$2000 and chameleons, which are not normally available in New Zealand, are a lucrative commodity for illegal dealers.

There was also evidence, said Mr Dickey, of a run in 1991 involving 16 bird eggs imported from the United States, although they were not the subject of any charge.

Mr Dickey said the authorities were concerned at New Zealand being used to "launder" eggs, particularly from Australia, with the aim of exporting them later as bred legally in captivity.

With documentation issued by the Ministry of Agriculture and the Department of Conservation, breeders can legitimately export the birds.

"The eggs would be hatched, and the chicks raised and sold either domestic-

ally or internationally."

Mr Dickey said Nichols was the principal player and Bradshaw, who allegedly assisted him in the first of the 1994 runs, was his lieutenant.

The eggs were brought in by couriers in special vests and the tortoises and chameleons were hidden under a courier's clothing and in a camera case.

Some of the birds brought into New Zealand had never been accounted for, said Mr Dickey. "The birds have hatched and we would not know what has come of them."

Once the eggs had hatched there was no way, short of using DNA tests, of proving that the birds were smuggled and had not been legitimately bred in captivity.

Mr Dickey said smuggling was a high bio-security risk to the poultry industry and to native birdlife.

Reptiles also carry various diseases, including salmonella.

One of the tortoises had a strain of salmonella never before encountered in New Zealand, which posed a risk to both wildlife and humans.

It was destroyed and the rest went to zoos in this country and overseas.

## Chapman gets time to pay debts

### In short

and slasher have been found guilty of attempted murder by a High Court jury in Wellington.

Rei Enoka, aged 34, a firewood contractor, Craig McKelvie, 27, and Enoka's son Corry, 15, had denied trying to kill Hoolaguns member Paul Delves outside the Wainuiomata gang pad in June.

The three were remanded in custody until next month for sentencing.

**ATTITUDE RAP:** A 16-year-old girl charged with the arson of Johnsonville School was reprimanded yesterday by the Chief Youth Court Judge for her attitude in court.

Judge David Carruthers took issue with her leaning against the back wall of the dock and having her hands in her pockets.

SC62 Doc. 41, Annex 7 - p. 26

The girl, who cannot be identified by law, objected to a condition of her bail which restricts her to her home suburb unless she is with her parents.

She and a 14-year-old boy appearing on the same charge were remanded for psychiatric report.

**TYRE WARNING:** The Levin corner has questioned the safety of mixing different tyres on a vehicle after a crash in which a child died.

During an inquest for 4-year-old Marcus Nahona, who drowned while trapped in a vehicle overturned in a ditch last year, Phil Comber called for a safety recommendation about mixing tyres.

A vehicle inspector, Douglas W., had found the vehicle roadworthy with radial tyres on the front and cross-ply on the rear, which he said could have caused the vehicle to fishtail.

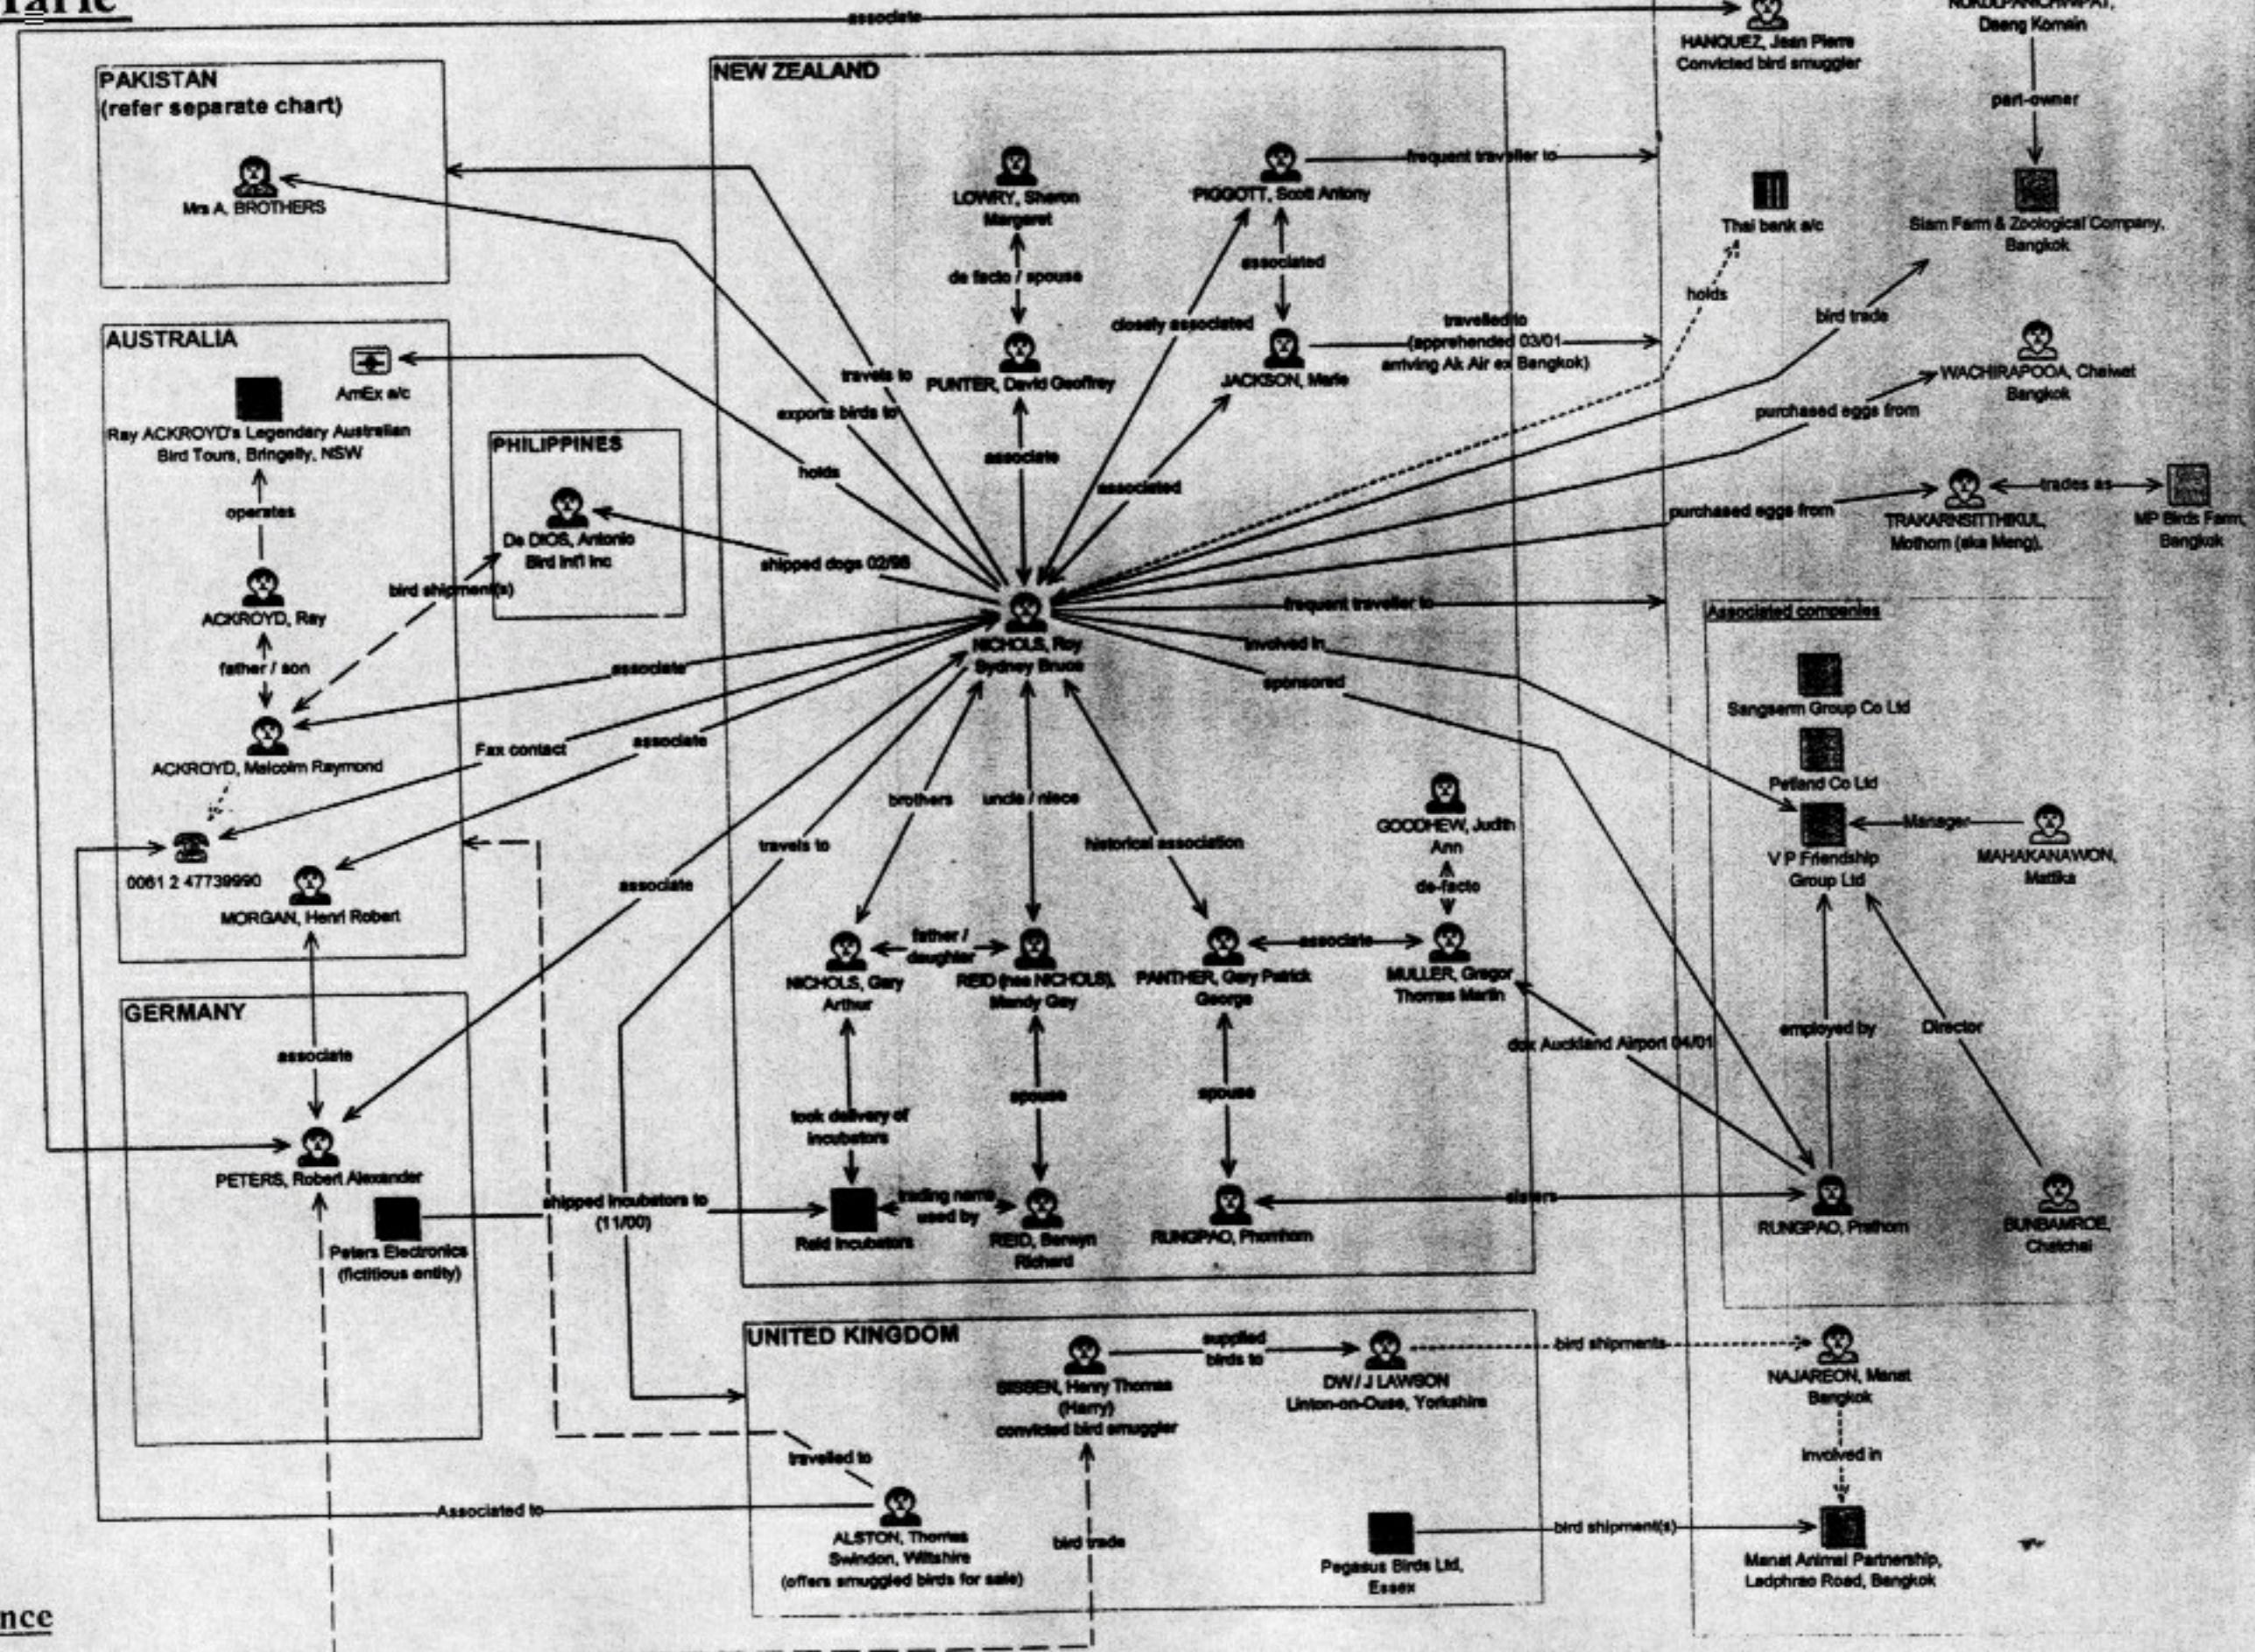

**FINES SLASHED:** An Auckland water-drilling firm has had its fines for unauthorised drilling slashed in the Court of Appeal.

Kiwi Drilling Company's fines and costs were reduced from \$154,666.66 to \$30,000, and director George William Smith's from \$53,333 to \$15,000.

**TRIO FOUND GUILTY:** Two men and a teenager who attacked a motorcycle gang member with a chainsaw, axe

CONSERVATION  
TE PAPA ATAWHAI

PERMIT NO. AE 15891

AUTHORITY TO EXPORT

PURSUANT to section 56 of the Wildlife Act 1953:

Roy Nichols  
78 Bollard Road  
Avondale  
Auckland  
NEW ZEALAND

is hereby authorised to export:

Ten (10) Rainbow Lorikeets (Trichoglossus haematodus moluccanus)  
Ten (10) Musk Lorikeets (Glossopsitta concinna)  
Ten (10) Scaly Breasted Lorikeets (Trichoglossus chlorolepidotus)  
Eight (8) King Parrots (Alisterus scapularis)

to:

Antonia De Dios  
Birds International Inc  
105 Timog Avenue, Diliman  
Quezon City  
PHILIPPINES

subject to the following conditions:

1. This authority must accompany the consignment waybill.
2. This authority must be accompanied by CITES checklist
3. Unless sooner revoked or varied this authority is valid for three (3) months from date of issue.
4. This authority must be accompanied by CITES export permit No. AE15891.

Dated at Auckland this 1st day of May 1991

REGIONAL CONSERVATOR (AUCKLAND)

## TRADE IN ENDANGERED SPECIES ACT 1989

CONVENTION ON  
INTERNATIONAL TRADE IN  
ENDANGERED SPECIES OF  
WILD FAUNA AND FLORA

### PERMIT TO EXPORT

Permit No. AE 15891  
Valid until 7 September 1991  
Valid for one consignment only

#### CONSIGNEE — name and address

Antonio De Dios  
Birds International Inc  
105 Timog Avenue, Diliman  
Quezon City, PHILIPPINES

#### PERMITTEE — name and address

Roy Nichols  
78 Bolland Avenue  
Avondale  
Auckland, NEW ZEALAND

#### SPECIAL CONDITIONS

All birds to be inspected by a  
Department of Conservation Officer  
before being shipped.

Birds to be shipped no more than  
10 to a cage.
