

## Implementation report format

The format below follows the structure of the *CITES Strategic Vision: 2008-2020* and aims to collect information to enable the Strategic Vision indicators to be implemented.

### **CITES vision statement**

Conserve biodiversity and contribute to its sustainable use by ensuring that no species of wild fauna or flora becomes or remains subject to unsustainable exploitation through international trade, thereby contributing to the significant reduction of the rate of biodiversity loss and making a significant contribution towards achieving the relevant Aichi Biodiversity Targets.

Article VIII, paragraph 7 (b), of the Convention requires each Party to submit to the CITES Secretariat a report on legislative, regulatory and administrative measures taken to enforce the provisions of the Convention.

The report format allows Parties to present information in a standard manner, so that it can be easily collated, with three main objectives:

- i) To enable monitoring of the implementation and effectiveness of the Convention;
- ii) To facilitate the identification of major achievements, significant developments, or trends, gaps or problems and possible solutions; and
- iii) Provide a basis for substantive and procedural decision-making by the Conference of the Parties and various subsidiary bodies.

Information on the nature and extent of CITES trade should be incorporated into the annual report [Article VIII paragraph 7 (a)], whereas the report provided under Article VIII paragraph 7 (b) should focus on measures taken to implement the Convention.

The report should cover the period indicated in [Resolution Conf. 11.17 \(Rev. CoP16\)](#) which urges that the report should be submitted to the Secretariat one year before each meeting of the Conference of the Parties (CoP). The reason for setting the report to be due a year in advance of the following CoP is to allow information to be collated so it can be considered by the Standing Committee in advance of CoP, and enable publication of the Strategic Vision indicators in advance of CoP.

Reports should be prepared in one of the three working languages of the Convention (English, French, Spanish).

Parties are *strongly* encouraged to prepare and submit their reports in electronic form. This will facilitate timely integration of information from Parties into publication of the Strategic Vision Indicators. If reports are only provided in hard copy, resources will be needed at the Secretariat to make an electronic copy, and this is not good use of Secretariat resources.

The completed report should be sent to:

<p>Arabian oryx formerly occurred in the deserts of the western UAE. The late Sheikh Zayed bin Sultan Al Nahyan, former President of the UAE, found a valuable breeding herd of oryx in Abu Dhabi that has furnished stock for reintroductions. Currently, two reintroductions of Arabian oryx in the UAE are well documented including the Arabian oryx release in the Dubai Desert Conservation Reserve and the Arabian oryx reintroduction in the Abu Dhabi Emirate. There are other oryx breeding herds in the UAE including Al Ain Zoo, Sharja's Breeding Centre for Endangered Arabian Wildlife, and several more private collections in Abu Dhabi and Dubai. Recent records showed that UAE hosts more than 7000 Arabian oryx.</p>			
<p>Over 40 years ago the founder of the UAE, the late Sheikh Zayed bin Sultan Al Nahyan, noted the decline of Houbara numbers in the wild. A committed environmentalist, Sheikh Zayed initiated Abu Dhabi's Houbara conservation programme in the 1970s based on a vision to sustain wildlife through the preservation of heritage and underpinned by principles that promote sustainability and maintain ecological balance. This was to be achieved by advancing knowledge and understanding of the species and applying the latest scientific capabilities and techniques to breed Houbara in captivity and release them into the wild to support and conserve wild populations of Houbara across its entire range. Recent recodes show that the number of birds produced in captivity has reached more than 590,000 houbara since 1996.</p>			
<p>The Breeding Centre for Endangered Arabian Wildlife was founded to prevent the extinction of these rare animals. Located in Sharjah Desert Park, this modern centre uses science and research to promote the breeding of nearly 200 species of threatened Arabian wildlife. The Arabian leopard is one of the success stories at this Sharjah wildlife centre, with the big cat's population in the wild slowly increasing from 250.</p>
