

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES  
OF WILD FAUNA AND FLORA

Twenty-sixth meeting of the Plants Committee  
Geneva (Switzerland), 5 – 9 June 2023

Compliance

Review of Significant Trade in specimens of Appendix-II species

OVERVIEW OF THE REVIEW OF SIGNIFICANT TRADE

1. This document has been prepared by the Secretariat.
2. In Resolution Conf. 12.8 (Rev. CoP18) on *Review of Significant Trade in specimens of Appendix-II species*, the Conference of the Parties:
  5. *DIRECTS the Secretariat, for the purpose of monitoring and facilitating the implementation of this Resolution and the relevant paragraphs of Article IV:*
    - a) *to report at each meeting of the Animals or Plants Committee on the implementation by the range States concerned of the recommendations made by the Committee; and*
    - b) *to maintain a database of species/country combinations that are included in the review process set out in this Resolution including a record of progress with the implementation of recommendations;*
3. The last update of the status of the Review of Significant Trade (RST) for flora species was reported to the Plants Committee at its 25th meeting (PC25; online, June 2021), see document [PC25 Doc. 15.1](#) and its [Addendum](#).

Implementation by range States of recommendations made by the Plants Committee

*Recommendations at PC25*

4. At PC25, the Chair of the Plants Committee provided an oral update regarding ongoing cases for species selected following CoP16 and CoP17, which the Plants Committee noted (see [PC25 SR](#)). Regarding species selected following CoP18, the Committee also noted document [PC25 Doc. 15.4](#) and further noted that the selection of new species/country combinations for review would be postponed until the first regular meeting of the Committee after the 19th meeting of the Conference of the Parties (*i.e.* PC26).
5. The Plants Committee also considered the inclusion of *Pterocarpus erinaceus* from all range States in the RST as an exceptional case, in accordance with paragraph 1 c) of Resolution Conf. 12.8 (Rev. CoP18) (see document [PC25 Doc. 15.5](#) and its [Addendum](#)). The Committee agreed to categorise eight *Pterocarpus erinaceus*/country combinations as 'action is needed', and therefore included these cases in Stage 2 of the RST (see also PC25 SR). The exceptional selection of *Pterocarpus erinaceus* in the RST process, including further background and developments since PC25 to the time of writing, is detailed in document PC26 Doc. 16.4 for consideration at the present meeting.

#### *Recommendations at SC74*

6. At its 74th meeting (SC74; Lyon, March 2022), the Standing Committee reviewed and retained within the RST nine cases of flora selected for review that were ongoing but not subject to a recommendation to suspend trade (see document [SC74 Doc. 30.1](#) and its [Addendum](#), and [SC74 SR](#)).
7. In addition, in compliance with paragraph 1 p) of Resolution Conf. 12.8 (Rev. CoP18), five flora cases where a trade suspension had been in place for more than two years were reviewed by the Standing Committee at SC74 (see document [SC74 Doc. 30.2](#)). These species/range State combinations were: Belize/*Myrmecophila tibicinis*; Côte d'Ivoire/*Pericopsis elata*; Equatorial Guinea/*Prunus africana*; Lao People's Democratic Republic/*Dendrobium nobile*; and Mozambique/*Cycas thouarsii*. The Standing Committee withdrew its recommendation to suspend trade for *Cycas thouarsii* from Mozambique, noting a report produced by the Scientific Authority of Mozambique and the Secretariat that concluded the species did not naturally occur in the country, and requested that the botanical nomenclature expert look into whether Mozambique is a range State for that species and, if appropriate, recommend updates to relevant databases. These updates were deemed warranted and reflected in CITES databases as of 21 March 2022. The remaining four flora cases for which a trade suspension had been in place for more than two years were retained in the review.

#### *Recommendations at SC75*

8. At its 75th meeting (SC75, Panama City, November 2022), the Standing Committee reviewed three cases of flora (see document SC75 Doc. 8). As a result, India/*Pterocarpus santalinus* was retained in the review, and Nepal/*Nardostachys grandiflora* and Paraguay/*Bulnesia sarmientoi* were removed from the review (see [SC75 SR](#)).
9. The most recent list of range States under a recommendation to suspend trade for certain species selected for the Review of Significant Trade, and following non-compliance with Article IV of the Convention, was published in Notification to the Parties No. [2023/034](#) of 23 March 2023. The recommendations and decisions were made in accordance with Resolution Conf. 12.8 (Rev. CoP18), Resolution Conf. 12.8 (Rev. CoP17), or Resolution Conf. 12.8 (Rev. CoP13), or its predecessor Resolution Conf. 8.9 (Rev.). The cases involving a suspension of trade are kept under regular review by the Standing Committee in line with paragraph 1 p) of Resolution Conf. 12.8 (Rev. CoP18).
10. Annex 1 to the present document provides an updated overview of the status of all RST cases (flora species/range State combinations) that were selected since CoP11 (2000), with an indication of their status under the review process, and the reference documents that provide detailed information for the cases in question. It also indicates the reviews that were completed since PC25. This annex comprises seven tables, showing the species selected by the Plants Committee for the RST following CoP11 up to CoP18.
11. Annex 2 presents a summary table of all flora species/country combinations currently in the RST as of March 2023. Further information on the review process for flora species selected between the 11th and 18th meetings of the Conference is provided in documents PC26 Doc. 16.2 and PC26 Doc. 16.4.

#### Decisions 17.108 (Rev. CoP19) to 17.110 (Rev. CoP19) on *Review of Significant Trade*

12. At its 19th meeting (CoP19, Panama City, 2022), the Conference of the Parties revised Decisions 17.108 (Rev. CoP19) to 17.110 (Rev. CoP19) on the Review of Significant Trade, as follows:

##### ***Directed to the Secretariat***

**17.108 (Rev. CoP19)** *The Secretariat, within six months of the 19th meeting of the Conference of the Parties and building on the work done to date, shall develop, test and establish a Review of Significant Trade Tracking and Management database as an essential tool for the effective implementation and transparency of the process.*

**17.109 (Rev. CoP19)** *The Secretariat, subject to the availability of funds, within six months of the 19th meeting of the Conference of the Parties, shall develop a user-friendly guide to the Review of Significant Trade that can also be included in the initial letter to range States.*

**17.110 (Rev. CoP19)** *The Secretariat, subject to the availability of funds, within nine months of the 19th meeting of the Conference of the Parties, shall develop a comprehensive training module on the Review of Significant Trade (including case studies as appropriate).*

13. At the 31st meeting of the Animals Committee (AC31, online, June 2021) and 25th meeting of the Plants Committee (PC25, online, June 2021), the Secretariat informed the Committees that the United Nations International Computing Centre had finalised the Review of Significant Trade (RST) Tracking and Management System in October 2020 and had been contracted to undertake the system's maintenance. The Secretariat further informed that the United Nations Environment Programme - World Conservation Monitoring Centre (UNEP-WCMC) had been contracted to populate the RST Tracking and Management System with the relevant documentation for all current RST cases (i.e., ongoing cases and those species/country combinations subject to a recommendation to suspend trade).
14. At a side event during CoP19, the Secretariat launched the RST Tracking and Management System making it publicly available to all CITES Parties and interested stakeholders. Accordingly, Decision 17.108 (Rev. CoP19) has been fully implemented.
15. In parallel, the Secretariat has worked with UNEP-WCMC to implement Decisions 17.109 (Rev. CoP19) and 17.110 (Rev. CoP19). In implementation of Decision 17.109 (Rev.CoP19), the Secretariat has made available a draft user-friendly guide for all public users of the RST Tracking and Management System, through Notification to the Parties No. [2023/022](#) of 2 March 2023. The Notification invited Parties to provide feedback on the Tracking and Management System and the draft user manual by 30 April 2023. A comprehensive training module in the form of a video tutorial is expected to be soon made available to all Parties and interested stakeholders in implementation of Decision 17.109 (Rev. CoP19).

#### Recommendation

16. The Plants Committee is invited to take note of this document.

Species/country combinations currently  
in the Review of Significant Trade (as of March 2023)

Countries are arranged in alphabetical order, with the relevant species in the second column. Cases where a recommendation to suspend trade is in place for a particular species/country combination are highlighted in green and the date of validation is indicated in the third column. The final column indicates when the species/range States combination was last discussed.
