Subject: Sweden's response to notification 2024/010

Vissa som fått det här meddelandet får inte ofta e-post från erik.dalarud@jordbruksverket.se. [Se varför det är viktigt](#)

Dear Secretariat,

The taxonomic reference in Notification 2024/010 is consistent with the taxonomic reference used in Sweden for the taxon concerned, see e.g., Dyntaxa which is managed by the Swedish Species Information Centre at the Swedish University of Agricultural Sciences (see <https://namnochslaktskap.artfakta.se/>).

Although, we think it would be better if the reference refers directly to Plants of the World online (link: <https://powo.science.kew.org/>) and download dates, to have a live checklist that is updated with taxonomic changes.

Sincerely,

Erik Dalarud
CITES Management Authority of Sweden
