

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES
OF WILD FAUNA AND FLORA

Twelfth meeting of the Conference of the Parties
Santiago (Chile), 3-15 November 2002

Interpretation and implementation of the Convention

Trade control and marking issues

Movements of collections of samples

MOVEMENTS OF SAMPLE REPTILE SKINS AND OTHER RELATED PRODUCTS

1. This document has been prepared by the Secretariat.
2. The Secretariat defers to the initiative of several Parties to discuss and propose revisions to Resolution Conf. 10.2 (Rev.) in order to facilitate the movement of sample collections (see document CoP12 Doc. 52.2 on the Use of certificates for movements of sample collections, covered by an ATA or TIR carnet and made of parts or derivatives of species included in Appendices II and III, submitted by Italy and Switzerland). The Secretariat considers that Decision 11.164 has been effectively met and has not prepared a different and competing proposal. Instead, it has provided substantive comments on document CoP12 Doc. 52.2.
