Annex 2 – Sample report (hypothetical examples)	15

Guidelines for the preparation and submission of the CITES annual illegal trade report

1. Introduction

- a) At its 17th meeting (CoP17, Johannesburg, 2016), the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) decided to introduce a new annual illegal trade report by inserting the following paragraph 3 in [Resolution Conf. 11.17 \(Rev. CoP17\) on National reports](#):

3. *URGES all Parties, commencing in 2017, to submit an annual illegal trade report by 31 October each year covering actions in the preceding year and in accordance with the report format distributed by the Secretariat, as may be amended by the Secretariat from time to time with the concurrence of the Standing Committee.*

- b) The standard format for the CITES annual illegal trade report was agreed by the Standing Committee at its 66th meeting and circulated to Parties in [Notification 2016/007 of 5 February 2016](#). For ease of reference, the reporting format has been included in Annex 1 to this guidance. The format is designed to collect specific information on seizures of CITES listed specimens, made by the authorities of a CITES Party. It is recommended that the CITES Management Authority, to the extent possible, collects the data from other authorities, such as customs, police and the judiciary and submit one consolidated annual illegal trade report.
- c) The present guidelines for the submission of CITES annual illegal trade reports were prepared by the Secretariat and approved by the Standing Committee. The guidelines include a report containing fictive examples prepared by the Secretariat, to illustrate the guidance. This report with fictive examples is provided in Annex 2 to this guidance.
- d) It is recalled that Resolution Conf. 11.17 (Rev. CoP17) directs the Secretariat to, unless otherwise specified by the reporting Party, share the data collected in the annual illegal trade report with the members of the International Consortium on Combating Wildlife Crime (ICCWC), to allow data to be used in ICCWC global research and analysis studies on wildlife and forest crime. Each reporting Party should indicate in the report whether the information provided may be used in the ICCWC-supported global research and analysis on wildlife and forest crime by ticking the appropriate box in the format for reporting.
- e) It is further recalled that Resolution Conf. 11.3 (Rev. CoP17) on *Compliance and Enforcement* in paragraph 14:

DIRECTS the Secretariat to, subject to available resources:

- a) *analyse, in collaboration with ICCWC partners, the annual reports on illegal wildlife trade;*
- b) *share with Parties information relating to the analysis to support further enforcement activities; and*
- c) *submit a report at each meeting of the Standing Committee and the Conference of Parties based on the analysis and other relevant information available through ICCWC partners.*

2. General principles

- a) Each annual illegal trade report should cover the period 1 January to 31 December.
- b) Annual illegal trade reports should be prepared in one of the three working languages of the Convention: English, French or Spanish.

3. Specific instructions

The headings in this section refer to the column headings in the CITES annual illegal trade report format, as set out in the Annex 1 to these guidelines.

Date of seizure

The date should correspond to the date contained in the official report on the seizure. If a specific date is not possible to establish on that basis, enter the month. The date should be indicated in the following format: DD/MM/YEAR or DD-MM-YEAR. Example: 9 July 2016 should be indicated as follows: 09/07/2016 or 09-07-2016, and if a specific date is not possible, enter the month as follows: XX/07/2016 or XX-07-2016.

If a Party want to report seizures made in a previous year, which were not included in its report for that year, it is suggested that such seizures are included and consolidated at the bottom of the annual illegal trade report, immediately after the last entry relevant to the actual year of reporting. Parties are encouraged to make every effort to limit such reporting to exceptional cases.

Species

Enter the scientific name of the species or subspecies. It is preferable that the scientific names used corresponds to those recorded in the Appendices or, for species included in the Appendices as part of a higher-taxon listing, those included in the standard lists of names approved by the Conference of the Parties (approved names can also be found in the [Checklist of CITES species](#) and in [Species+](#)). Abbreviations (e.g. “*F. cherrug*”) and common names should preferably only be used if no other information is available.

Only one species should be included per row of the annual illegal trade report. If more than one species and/or more than one type of specimen for a specific species were seized on the same date, these should be put on separate rows, each with corresponding quantity and unit, method of concealment, etc.

The names of higher taxa should only be used to indicate the species if the specimens cannot be identified, in which case the name of the genus or a higher taxon should be indicated.

Description of specimen

It is recommended that the seized specimens be described as precisely as possible. For this purpose, reporting Parties are invited to use the trade term codes, listed in section 6 a) below. If it is not clear which is the correct term to use, or if the specimens are not apparently covered by any of the terms in section 6 a), Parties should describe the seized specimens directly in this column.

Quantity

Enter the numerical value for the quantity of items seized. Quantity and unit should be indicated in separate columns. See next section for details of reporting units.

The use of thousand separators (e.g. comma, point or space/period) in the quantity field should be avoided, and use of either a point or a comma as a decimal separator should be consistent throughout the report.

Unit

Enter the appropriate unit of measurement for the description of the specimens that have been seized using the units provided in section 6 a). As far as possible, units for weight, volume and length should be recorded in metric measures. Quantities should always be recorded in standard units of measure and never in non-standard units such as ‘boxes’, ‘cartons,’ ‘containers’ or ‘bales’.

If no unit is specified, this will be assumed to mean “number” (e.g. number of live animals).

Location of incident

The location where the seizure took place should be indicated. If possible, this should be specified by the name of a port of entry, the name of an airport, a city/town or a specific border crossing. The address of the location is not required. If no information on the location of the seizure is available, the name of the country in which the seizure took place should be indicated.

Detecting agency

The agency that discovered the offence should be indicated. In the electronic format for reporting, the following options have been pre-selected: police, customs or wildlife agency. These three would include

all agencies administratively linked to them. For instance, the customs authorities may have specific units in airports, in ports and harbours and at border crossings. However, as they are all part of the Customs, that option should be selected. If none of the pre-selected authorities seized the specimen, please indicate the authority in question (this could for instance be the fisheries inspection or veterinary services).

Reason for seizure

The legal reason for the seizure should be indicated. The pre-selected options are: No CITES permit, mis-declared, illegal crossing, other (please specify).

No CITES permit: This means that the specimen seized should have been accompanied by a CITES permit or a CITES certificate but that no documents were provided upon request. It would also cover situations where the specimen was found unaccompanied.

Mis-declared: This covers cases of invalid permits (e.g. expired) fraudulent permits (e.g. fraudulent signature), inexact permits (wrong species, quantity, listing), insufficient permits (e.g. no import permit for App. I listed species).

Illegal crossing: Most Parties have designated points and ports of entry in their national CITES legislation in accordance with paragraph 3 of Article VIII of the Convention. Illegal crossing refers to passage outside those designated points, even with valid CITES documents.

Other (please specify): This could for instance cover incidents of trade involving a Party that is currently under a recommendation to suspend trade.

Means of transport

This refers to the means of transport that was used at the time of the seizure. The four possible means of transport that have been pre-selected are air, sea, land and post. If several means of transport were used in the transaction that led to the seizure, the latest means should be selected. E.g. if a specimen had travelled from country A to country B by air but was seized as it crossed the border from country B to country C by land, "land" should be selected as the means of transport.

If the seizure took place before any transport or after the transport of the illegal consignment and no information is available on the means of transport, please indicate 'not applicable' or 'unknown,' whichever is the more relevant

Method of concealment

Please describe in a concise manner the way the specimen was concealed. The method of concealment will often depend on the means of transport and on the type of specimens. There are unlimited ways of concealing illegally traded specimens and therefore no pre-selected options are proposed in the format. If useful and available, add information on the means of transport. Please see sample report in Annex 2 to this guidance for examples.

Alleged country of origin

If available, the name of the country of origin should either be indicated in full or by the use of two-letter ISO codes for the representation of names of countries, in accordance with the list in section 6 b) below. If the country of origin is unknown, this should be indicated as "XX" or "Unknown". Do not use any other country codes or country names than the ones listed in section 6 b).

Country(ies) of transit

All known countries of transit should be indicated, and multiple transit countries should as far as possible be listed in the actual trade order. This is critically important information to better understand illegal trade routes. Please use the full name of transit countries or use the two-letter ISO codes for the representation of names of countries, in accordance with the list in section 6 b) below. If more detailed information is available concerning the trade route (i.e. name of port or airport, or border crossing), this may be provided as well.

Alleged final destination

If available, the country of final destination should be indicated by in full or by the use of two-letter ISO codes for the representation of names of countries, in accordance with the list in section 6 b) below. If additional information about the final destination is available (e.g. region or city), this may be provided as well. If the final destination is unknown or not possible to credibly establish, this should be indicated as "XX" or "Unknown".

Estimated value in country (optional)

The estimated value of the entire consignment should be indicated. E.g., if a shipment of 90 specimens each worth approximately USD 200 has been seized, the estimated value to indicate would be USD 18000. If several species were seized in one shipment (see above), they need to be reported on separate lines and information about their value will be provided separately as well.

If an exact price/value of the seized shipment is not available, provide where possible a small range, e.g. USD 500-600 (keep the range as small as possible). Even an estimated value will be helpful to assess the total value of global illegal trade in specimens of CITES-listed species. It is preferable to provide the value in a globally recognized currency, such as USD or EUR, but if not possible, indicate in the currency in which the value has been provided.

The use of thousand separators (e.g. comma, point or space/period) in the value field should be avoided.

Nationality of offenders (optional)

Where possible and if available, provide the nationality of each offender against whom administrative measures, criminal prosecutions or other court actions associated with the seizure have been initiated or imposed. If an offender has more than one nationality, please indicate all of them.

If no offender was identified, please indicate "Not applicable".

Please do NOT include the names of any offenders in the report. Parties who wish to bring the names of offenders to the attention of the CITES Secretariat, should do so through separate correspondence.

Information on the court case related to the seizure

The last three columns relate to a subsequent court case under which the offenders are brought to trial and sentenced as well as the final disposal of the confiscated specimens. These are marked as desirable because the information requested may only become available much later in time than the actual seizure. If information is not available because the case has not yet been finalized in court, please indicate this. If the case has been withdrawn, please indicate this, including the reasons for the withdrawal if possible.

Please note that information that becomes available subsequently to the submission of the annual illegal trade report should be reported in the Implementation report. See Notification 2016/006, and in particular section 1.7.5 on *inter alia* criminal prosecutions and other court actions for CITES-related offenses. There is no need to report the same information in both reports.

Law under which the charges were brought (desirable)

If no charges have been brought, please indicate this.

If charges have been brought but the case not yet heard or concluded, information on the law under which the charges were brought can be provided. If several laws have been invoked in the charges, please indicate all of them.

Sanction (desirable)

If the case has been heard and a sentence pronounced, please indicate the sanction(s) (imprisonment, fine, confiscation, etc.) If there are more elements in the sanction, please include all of them. If an appeal is pending, please note this as well, but indicate the sanction pronounced in the first instance.

If the case has not (yet) been heard, please indicate this, using the term 'pending'.

Disposal of confiscated specimens (desirable)

Information in this column should include disposal of seized specimens in the instances where the seizure is final. In cases where disposal of the seized specimens can only take place after a court decision on confiscation, the information should only be provided when the final court decision has occurred.

Reference is made to Resolution Conf. 17.8 on Disposal of illegally traded and confiscated specimens of CITES-listed *species* and the recommendations set out therein. The following pre-selected options are available to indicate the final disposal of the confiscated/seized specimens:

Returned to the country of export

Public zoos or botanical gardens

Designated rescue centres

Approved, private facilities

Euthanasia

Other (please specify):

Note that the pre-selected options are mostly relevant for confiscated live specimens as included in the annexes to the Resolution Conf. 17.8. For dead specimens (including processed products), options for disposal include also sale (App. II-species), transformation and destruction.

4. Recommended format

- a) Annual illegal trade reports should, where possible, be submitted in electronic format (ideally in electronic tabular form, such as tables within Microsoft Excel or Microsoft Word documents). Submission of PDF files should preferably be avoided as these cannot be easily converted.
- b) The format of the information submitted should correspond to that indicated in the **Sample Reports** provided below. The format in Excel is available on [this link](#).

5. Submission of annual illegal trade reports

- a) Annual illegal trade reports should be submitted to the Secretariat before **31 October** of the year following the year to which they relate.
- b) Annual illegal trade reports should be sent to the offices of the CITES Secretariat in Switzerland by email. Only the following email should be used: Reporting@cites.org.

6. Terminology

- a) Description of specimens and units of quantity

Description	Code	Preferred unit	Alternative unit	Explanation
baleen	BAL	kg	no.	whalebone
bark	BAR	kg		tree bark (raw, dried or powdered; unprocessed)
body	BOD	no.	kg	substantially whole dead animals, including fresh or processed fish, stuffed turtles, preserved butterflies, reptiles in alcohol, whole stuffed hunting trophies, etc.
bone	BON	kg	no.	bones, including jaws
calipee	CAL	kg		calipee or calipash (turtle cartilage for soup)

Description	Code	Preferred unit	Alternative unit	Explanation
carapace	CAP	no.	kg	raw or unworked whole shells of Testudines species
carving	CAR	kg	no.	carved products other than ivory, bone or horn – for example coral and wood (including handicrafts). N.B: Ivory carvings should be specified as such (see below – “IVC”). Also, for species from which more than one type of product may be carved (e.g. horn and bone), the trade term code should indicate the type of product in trade (e.g. bone carving “BOC” or horn carving – “HOC”), where possible.
carving - bone	BOC	kg	no.	bone carving
carving - horn	HOC	kg	no.	horn carving
carving - ivory	IVC	kg	no.	ivory carvings, including e.g. smaller worked pieces of ivory (knife handles, chess sets, marjoram sets etc). N.B. Whole carved tusk should be reported as tusks (see “TUS” below). Jewellery made from carved ivory should be reported as ‘jewellery – ivory’ (see IJW below).
caviar	CAV	kg		unfertilized dead processed eggs from all species of Acipenseriformes; also known as roe
chips	CHP	kg		chips of timber, especially <i>Aquilaria</i> spp., <i>Gyrinops</i> spp. and <i>Pterocarpus santalinus</i>
claw	CLA	no.	kg	claws – e.g. of Felidae, Ursidae or Crocodylia (NB: ‘turtle claws’ are usually scales and not real claws)
cloth	CLO	m ²	kg	cloth – if the cloth is not made entirely from the hair of a CITES species, the weight of hair of the species concerned should instead, if possible, be recorded under ‘HAI’
coral (raw)	COR	no.	kg	raw or unworked coral and coral rock (also live rock and substrate) [as defined in Resolution Conf. 11.10 (Rev. CoP15)]. Coral rock should be recorded as ‘Scleractinia spp.’ NB: the trade should be recorded by number of pieces only if the coral specimens are transported in water. Live rock (transported moist in boxes) should be reported in kg; coral substrate should be reported as number of pieces (since these are transported in water as the substrate to which non-CITES corals are attached).
cosmetics	COS	g	ml	cosmetics which include extracts of CITES-listed species. The quantity should reflect the amount of CITES-listed species present.
culture	CUL	no. of flasks, etc.		cultures of artificially propagated plants
derivatives	DER	kg	l	derivatives (other than those included elsewhere in this table)
dried plant	DPL	no.		dried plants – e.g. herbarium specimens

Description	Code	Preferred unit	Alternative unit	Explanation
ear	EAR	no.		ears – usually elephant
egg	EGG	no.	kg	whole dead or blown eggs (see also 'caviar')
egg (live)	EGL	no.	kg	live fertilized eggs – usually birds and reptiles but includes fish and invertebrates
eggshell	ESH	g/kg		raw or unworked eggshell except whole eggs
extract	EXT	kg	l	extract – usually plant extracts
feather	FEA	kg/ no. of wings	no.	feathers – in the case of objects (e.g. pictures) made of feathers, record the number of objects
fibre	FIB	kg	m	fibres – e.g. plant fibre but includes strings of tennis rackets
fin	FIN	kg		fresh, frozen or dried fins and parts of fins (including flippers)
fingerlings	FIG	kg	no.	juvenile fish of one or two years of age for the aquarium trade, hatcheries or for release operations
flower	FLO	kg		flowers
flower pot	FPT	no.		flower pots made from parts of a plant – e.g. treefern fibres (NB: live plants traded in so-called 'community pots' should be recorded as 'live plants', not as flower pots)
frog legs	LEG	kg		frog legs
fruit	FRU	kg		fruit
foot	FOO	no.		feet – e.g. of elephant, rhinoceros, hippopotamus, lion, crocodile, etc.
fur products (large)	FPL	no.		large manufactured products of fur – e.g. bear or lynx fur blankets or other fur products of a substantial size.
fur product (small)	FPS	no.		small manufactured products of fur– including handbags, key fobs, purses, pillows, trim, etc.
gall	GAL	kg		gall
gall bladder	GAB	no.	kg	gall bladder
garment	GAR	no.		garments – including gloves and hats but not shoes. Includes trimming or decoration on garments
genitalia	GEN	kg	no.	castrates and dried penes
gill plates	GIL	no.		gill plates (e.g. for sharks)
graft rootstock	GRS	no.		graft rootstocks (without the grafts)
hair	HAI	kg	g	hair – includes all animal hair, e.g. of elephant, yak, vicuña, guanaco
hair products	HAP	no.	g	products made of hair (e.g. elephant hair bracelets)
horn	HOR	no.	kg	horns – includes antlers

Description	Code	Preferred unit	Alternative unit	Explanation
jewellery	JWL	no.	g	jewellery – including bracelets, necklaces, and other items of jewellery from products other than ivory (e.g. wood, coral, etc.)
jewellery - ivory	IJW	no.	g	jewellery made of ivory
leather product (large)	LPL	no.		large manufactured products of leather – e.g. briefcases, furniture, suitcases, travel trunks
leather product (small)	LPS	no.		small manufactured products of leather – e.g. belts, braces, bicycle saddles, cheque book or credit card holders, handbags, key fobs, notebooks, purses, shoes, tobacco pouches, wallets, watch-straps and trim
live	LIV	no.	kg	live animals and plants
leaf	LVS	kg	no.	leaves
logs	LOG	m ³		all wood in the rough, whether or not stripped of bark or sapwood, or roughly squared, for processing notably into sawn wood, pulpwood or veneer sheets. NB: trade in logs of special purpose timbers traded by weight (e.g. lignum vitae, <i>Guaiacum</i> spp.) should be recorded in kg
meat	MEA	kg		meat, including flesh of fish if not whole (see 'body'), fresh or unprocessed meat as well as processed meat (e.g. smoked, raw, dried, frozen or tinned)
medicine	MED	kg	l	medicine
musk	MUS	g		musk
oil	OIL	kg	l	oil – e.g. from turtles, seals, whales, fish, various plants
pearl	PRL	no.		pearl (e.g. for <i>Strombus gigas</i>)
piano keys	KEY	no.		ivory piano keys (e.g. one standard piano would be 52 ivory piano keys)
piece – bone	BOP	kg		pieces of bone, not manufactured
piece – horn	HOP	kg		pieces of horn, not manufactured – includes scrap
piece – ivory	IVP	kg		ivory pieces, not manufactured – includes scrap
plate	PLA	m ²		plates of fur skins – includes rugs if made of several skins
plywood	PLY	m ²	m ³	material consisting of three or more sheets of wood glued and pressed one on the other and generally disposed so that the grains of successive layers are at an angle
powder	POW	kg		powder
pupae	PUP	no.		butterfly pupae
root	ROO	no.	kg	roots, bulbs, corms or tubers NB: For the agarwood-producing taxa <i>Aquilaria</i> spp. and <i>Gyrinops</i> spp., the preferred unit is 'kilograms'. The alternative unit is 'number'.
rug	RUG	no.		rugs

Description	Code	Preferred unit	Alternative unit	Explanation
sawfish rostrum	ROS	no.	kg	sawfish rostrum
sawn wood	SAW	m ³		wood simply sawn lengthwise or produced by a profile-chipping process; normally exceeds 6mm in thickness. NB: trade in sawn wood of special purpose timbers traded by weight (e.g. lignum vitae, <i>Guaiacum</i> spp.) should be recorded in kg
scale	SCA	kg		scales – e.g. of turtle, other reptiles, fish, pangolin
seed	SEE	kg		seeds
shell	SHE	no.	kg	raw or unworked shell of molluscs
side	SID	no.		sides or flanks of skins; does not include crocodilian Tinga frames (see under 'skin')
skeleton	SKE	no.		substantially whole skeletons
skin	SKI	no.		substantially whole skins, raw or tanned, including crocodilian Tinga frames, external body lining, with or without scales
skin piece	SKP	kg		skin pieces – including scraps, raw or tanned
skull	SKU	no.		skulls
soup	SOU	kg	l	soup – e.g. of turtle
specimen (scientific)	SPE	kg/l/ml/ no.		scientific specimens – includes blood, tissue (e.g. kidney, spleen, etc.), histological preparations, preserved museum specimens, etc.
stem	STE	no.	kg	plant stems NB: For the agarwood-producing taxa <i>Aquilaria</i> spp. and <i>Gyrinops</i> spp., the preferred unit is 'kilograms'. The alternative unit is 'number'.
swim bladder	SWI	kg		hydrostatic organ, including isinglass / sturgeon glue
tail	TAI	no.	kg	tails – e.g. of caiman (for leather) or fox (for garment trimming, collars, boas, etc.), also includes flukes of cetaceans.
tooth	TEE	no.	kg	teeth – e.g. of whale, lion, hippopotamus, crocodile, etc.
timber	TIM	m ³	kg	raw timber except saw-logs and sawn wood
trophy	TRO	no.		trophy – all the trophy parts of one animal if they are exported together: e.g. horns (2), skull, cape, backskin, tail and feet (i.e. ten specimens) constitute one trophy. But if, for example, the skull and horns are the only specimens of an animal that are exported, then these items together should be recorded as one trophy. Otherwise the items should be recorded separately. A whole stuffed body is recorded under 'BOD'. A skin alone is recorded under 'SKI'. Trade in 'full mount', 'shoulder mount' and 'half mount', along with any corresponding parts

Description	Code	Preferred unit	Alternative unit	Explanation
				of the same animal exported together on the same permit, should be reported as '1 TRO'
trunk	TRU	no.	kg	elephant trunk. N.B.: An elephant trunk exported with other trophy items from the same animal on the same permit as part of a hunting trophy should be reported as 'TRO'.
tusk	TUS	no.	kg	substantially whole tusks, whether or not worked. Includes tusks of elephant, hippopotamus, walrus, narwhal, but not other teeth
veneer sheets – rotary veneer – sliced veneer	VEN VEN	m ³ m ²	kg kg	thin layers or sheets of wood of uniform thickness, usually 6mm or less in thickness, usually peeled (rotary veneer) or sliced (sliced veneer), for use in making plywood, for veneering furniture, veneer containers, etc.
wax	WAX	kg		wax
wood product	WPR	no.	kg	manufactured wood products, including finished wood products such as furniture and musical instruments.

Key to units of measure

Unit of Measure	Unit Code
Grams (g)	GRM
Kilograms (kg)	KIL
Litres	LTR
Millilitres (ml)	MLT
Metres (m)	MTR
Cubic centimetres (cm ³)	CCM
Square metres (m ²)	SQM
Cubic metres (m ³)	CUM
Number of specimens	"No." or leave blank

NB. If no unit is specified, this will be assumed to mean "number" (e.g. number of live animals).

b) Names of countries and territories

The countries and entities listed below are designated in accordance with the *English country names and code elements* published by the International Organization for Standardization (ISO). Out-of-date names of countries and territories are retained for purposes of recording re-exports of specimens originating in those places. The ISO list is based on the list included in the *United Nations Standard Country or Area Code for Statistical Use* established by the Statistical Office of the United Nations. The names of countries, territories or other areas correspond to those given in the United Nations *Terminology Bulletin*, issued by the Department of Conference Services. Some additional entities are included in the [ISO International Standard](#) with a view to providing more complete global coverage. However, the designations do not imply the expression of any opinion whatsoever on the part of the CITES Secretariat or the Secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.
