

NOTIFICATION TO THE PARTIES

No. 2021/045

Geneva, 12 July 2021

CONCERNING:

HONDURAS

Wildlife mobile application: an electronic tool for law enforcement
Fact-sheet update and multi-language functionality

1. This notification is published at the request of Honduras.
2. Honduras, as Regional Representative for Central and South America and the Caribbean on the CITES Standing Committee, is pleased to inform the Parties that the Wildlife mobile application, the electronic tool that supports law enforcement, has been updated.
3. This update included a revision of the technical and legal information provided on the fact sheets for species recognition, and the addition of a multi-language function (English–Spanish) to enable users to view fact sheets in their language of choice. https://youtu.be/Y95q_Jw_TZE
4. The updated application also includes new content for the recognition and identification of species of the genera *Abronias* and *Agalychnis*, as well as recent legislation enacted by countries in the region that can be consulted and downloaded.
5. The CITES Authorities from the region and members of the Central American and Dominican Republic Wildlife Enforcement Network (CAWEN) will continue to work with national and regional technical experts in the preparation and future translation of further species fact sheets.
6. Honduras extends its appreciation to the technical and scientific experts for their contribution to this effort, and thanks the International Technical Assistance Program implemented by the United States Department of the Interior for continuing to support the region through environmental cooperation and funding from the United States State Department.
7. We invite the Parties to download this tool, which is available on Google Play Store and Apple App Store. For further information, visit <https://vidasilvestre.net/> or contact jsuazo25@yahoo.es or fatima.vanegas@cooperacion-doi.org
